

Encycle Launches Swarm Mobile App for Users of Swarm Logic® Energy-Saving Software

SWARM MOBILE IS NOW AVAILABLE FOR CUSTOMERS OF SWARM LOGIC® ENERGY-SAVING SOFTWARE TO ACCESS DATA IN REAL-TIME FOR INDIVIDUAL BUILDINGS AND ENTERPRISE-WIDE PORTFOLIOS.

SAN MARCOS, Calif., June 2, 2023 – [Encycle Corporation](#), a data-driven technology company focused on helping multi-site commercial and industrial businesses dramatically improve the efficiency of their HVAC systems using IoT-enabled services, announced the release of Swarm Mobile App for phone and tablets on iOS and Android platforms. Swarm Mobile is available for customers of [Swarm Logic®](#) energy-saving software to access data in real-time for individual buildings and enterprise-wide portfolios.

Swarm Mobile App provides powerful benefits and valuable features, including:

- Remotely access key details on HVAC performance for any site location within your company's building portfolio
- Search for specific buildings by name or for HVAC faults by type
- View real-time sensor readings and setpoints of installed HVAC equipment
- Robust user management with role-based security including restricting which building(s) a user is permitted to access
- Portfolio-wide schedules and setpoint management for connected thermostats
- Demand response activity monitoring including opt-in and opt-out of events
- View current and historical fault detection details for specific HVAC assets
- Share the HVAC sensor and fault details via clipboard, email, or other methods

Removing the silos around these traditionally closed systems with convenient visibility on HVAC operations enables facilities management teams and their service providers to be more efficient, communicative, and responsive to day-to-day needs. Access to data is immediate, it is up to date, and it is transparent, allowing all stakeholders to work from the same point of reference for efficient HVAC asset management. Swarm Mobile data provides insights and analytics for proactive and preventive maintenance to help avoid unscheduled disruptions and prolong equipment life.

How to download the App

The app can be downloaded for free from the respective device stores. Phones and tablets are supported. Swarm Logic subscription required for use.

- For Android: <https://play.google.com/store/apps/details?id=com.encycle.swarm>
- For iOS: <https://apps.apple.com/gb/app/swarm-logic/id1590358127>

Encycle serves a broad range of markets, including retail stores, grocery stores, shopping centers, restaurants, entertainment venues, offices, schools, distribution centers, and light/medium manufacturing. Customers whose buildings range from 7,500 square feet to 2 million square feet or more realize the greatest benefit from Encycle's Swarm Logic technology.

Swarm Logic is a multi-patented, proven energy management solution that optimizes HVAC operations to reduce energy waste, lowers emissions and has been successfully deployed at over 1,700 sites and more than 17,000 HVAC assets.
